\*\*\* Notes of Significance \*\*\*

South Fork Zone consists of 3 fires on the Caribou-Targhee National Forest Black, Carrot, and Big Elk.

## Evening Brief

Date/Time Stamp: **Monday, August 29, 2016 - 8:47 PM**

---

### Weather Summary

\*\*\* **HIGH RISK for LIGHTNING WEDNESDAY NE NEVADA...NRN UTAH...ERN IDAHO...WRN WYOMING** \*\*\*

\*\*\* **HIGH RISK for WIND/LOW RH IDAHO WED** \*\*\*

As low pressure moves into the Pacific NW, along with its cold front...winds will start to pick up ahead of the front across northern Nevada and western Idaho late Tue, spreading to the rest of Idaho and northern Utah Wednesday. **High Risk** has been issued for parts of Idaho where winds might be strongest, in areas of existing large fires.

At the same time, scattered showers and some thunderstorms are now expected to form along this front late Wednesday, with the most likely areas being northeast Nevada, eastern Idaho, western Wyoming and far northern Utah. **High Risk** has been issued for these areas:

**See map**

Behind the front Thursday, continued breezy conditions with a cooling trend into the end of the week. Some more showers over ID possible Friday.

---

### Preparedness Levels

**Current:**

Great Basin	4
National	4

---

**Great Basin Fire Activity: Light Initial Attack**

**New Fires and Acres: 7 fires for 173 acres / 2,310 acres Large Fire Growth**

---

### Great Basin Fire Potential Summary

ERC's remain near or beyond the 97th percentile across a large portion of northern Nevada, Idaho, western Wyoming and far northern Utah. With ongoing fires in Idaho and western Wyoming into northern Utah, there is the potential for significant growth still in the coming days as breezy, drier and warmer weather returns. Dry lightning in areas of extremely dry fuels in northeast Nevada and eastern Idaho, western Wyoming and northern Utah Wednesday. Moist fuel conditions are expected to continue across southern portions of UT/NV and the Arizona Strip this week.
